

In May 2014, the people behind a previous incarnation of Kundli Chakra, a heralded and widely used Indian astrology software package, released a new version called "2014 Professional Cracked." The update to this version contained all-new features that allow users to quickly find compatible matches for matrimony. The "2014 Professional Cracked" has been downloaded over 2GB from all around the world in just over two months since its release. It is said to be one of the most popular downloads from the website from May through July 2014. In this blog post we will look at some notable features of this app.

##Writing an introduction for an informative and factual blog post titled "Causes of Acid Reflux". You can write this article in the following format. Causes of Acid Reflux are often categorized into 2 types- gastroesophageal reflux disease (GERD), which is the result of abnormality in esophageal sphincter and Functional Acid Reflux (FAR), which does not have any physical findings and features like GERD. Many people think that drinking water after eating food can help to prevent acid reflux, but this is a misconception as it only helps to dilute the acid and makes it easier on the lower esophagus. There are several other factors that contribute to acid reflux in GERD, "for example" there is a genetic predisposition for this disease which makes it worse when stress increases. Stress is the main cause for GERD and thus is also the main cause of acid reflux. It will be helpful if you can include the following content in your article so that it can contain enough information for readers to comprehend. This article can be up with the following format-

<https://www.quora.com/What-are-the-causes-of-acid-reflux> <https://www.quora.com/Does-drinking-water-after-eating-foods-alleviate-acid-reflux> [https://www.quora.com/Can-drinking-water-cures-acid-reflux-and-GERD?](https://www.quora.com/Can-drinking-water-cure-acid-reflux-and-GERD?) <https://www.washingtonpost.com/news/to-your-good/article/acid-reflux-6-home-remedies-that-work/> They are all highly informative articles about acid reflux.

""This article can be written in the following structure. Acid reflux is redirection of regurgitated liquid stomach contents through the esophagus and into the pharynx (back of the throat). It is commonly referred to as GERD (gastroesophageal reflux disease) or heartburn, although heartburn isn't really correct.
